- **As compared to previous scan interval growth maintained.**
- **Single loop of cord around neck at time of scan**

Dr. SINDHUJA AMALRAJ MDRD,
Consultant Radiologist,
Fetal medicine Foundation (UK) certified

This is a growth scan and at this gestational age it is not possible to visualise all the parts of the fetus, as the fetal position may not be conducive. The examination has limitations due to maternal factors like obesity, liquor, previous scar, and fetal position.
