- **Gestational age assigned as per LMP.**
- **EDD -16.02.2025**
- **Placenta - Posterior**
- **Liquor - Oligohydramnios**
- **Single loop of cord seen on three sides of neck at time of scan**

  
**DR. ARUL. J MBBS, PGDM(USG), PGRD**  
Consultant Radiologist,

*This is a growth scan and at this gestational age it is not possible to visualise all the parts of the fetus, as the fetal position may not be conducive. The examination has limitations due to maternal factors like obesity, liquor, previous scar, and fetal position.*
